

Isaac Ojo

Full stack Developer / App Developer

As a highly motivated and skilled Full stack developer, I have a strong foundation in computer science and a passion for creating intuitive and visually appealing web applications. With experience in the full stack of modern web development technologies, including MongoDB, Express, React, and Node.js, I am confident in my ability to design and build high-quality web applications that meet the needs of users. I am always looking for ways to improve and stay up-to-date with the latest developments in web development, and I am eager to take on new challenges and contribute to the success of a forward-thinking company.

Work History

2023-01 – Front End Developer (Contract)

2023-02 Wadi Africa

- Created a User dashboard and Admin Dashboard with React
- Developed login and registration pages
- Implemented responsive design and accessibility features for all the pages. These features ensured that the pages looked good on different devices and were accessible to users with disabilities.
- Adding animations and transitions to enhance the user experience and visual appeal of the web pages.

2022 - Full Stack Developer (Node + React)

Present Freelance

- Created express node.js REST API to fetch, update and create blog posts and user data on Mongo DB [TS-NODE]
- Built a robust react front end for a blog that fetches, updates and creates blog posts and user data on Mongo DB
- Built a Propriety Full Stack Web App for a real estate company
